## DETAILED ACTION

### ***Specification***

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### ***Claim Objections***

2. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 59-84 have been renumbered 1-26.

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 3727

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-24 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11,13,14, and 22-25 of U.S. Patent No. 5,992,673. Although the conflicting claims are not identical, they are not patentably distinct from each other because each teaches a container having two lid portions hinged together for cooperative movement with respect to the container body and the lid portions being detachable from the container body. The patent claims are silent regarding an angle at which detachment occurs. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the more broad language of "detachable" as set forth in the patent claims to negate a specific angle of inclination for removal of the lid portions.

5. Claims 1-24 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 and 4-32 of U.S. Patent No. 6,036,049. Although the conflicting claims are not identical, they are not patentably distinct from each other because each teaches a container having two lid portions hinged together for cooperative movement with respect to the container body and the lid portions being detachable from the container body. The patent claims teach the lid portions detach from the container body at an angle less than 180°. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use a range of angles for detachment of the lid portions from the container body (i.e., provide more broad terms).

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3727

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-3,8,10, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Crate (US 3,126,120).

See figs. 1-5.

8. Claims 1,2,4, and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Jamison (US 5,673,791).

9. Claims 1,2, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Robertson (US 5,146,650).

See col. 3, lines 53-65.

#### *Claim Rejections - 35 USC § 103*

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

11. Claims 13,14, and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Robertson in view of Webb (US 4,685,567).

Robertson teaches the claimed container except for a fastener.

Webb teaches a container having a fastener 14,39,41 for securing a lid to the container body.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to apply the teaching of a fastener to the container of Robertson. Doing so maintains the lid in a closed position with the container body.

Art Unit: 3727

12. Claims 22 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Webb.

Webb teaches the claimed container except is not explicit about removal of the lid. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide removal lid portions by removing the pins of the container of Webb. Doing so allows for removal of the lid from the container body to allow for easier access and nesting of plural containers.

***Allowable Subject Matter***

13. Claims 18,6,7,9,11,19-21 appear to be allowable if rewritten or amended to overcome the rejections under non-statutory double patenting set forth in this Office action.

14. Claims 24-26 appear to be allowable if rewritten to overcome the rejection(s) non-statutory double patenting set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Conclusion***

15. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Various containers similar to that disclosed and/or claimed are cited for their disclosures.

16. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (703) 305-3579. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 3720 will be promptly forwarded to the examiner.

Art Unit: 3727

17. It is called to applicant's attention that if a communication is faxed before the reply time has expired, applicant may submit the reply with a "Certificate of Facsimile" which merely asserts that the reply is being faxed on a given date. So faxed, before the period for reply has expired, the reply may be considered timely. A suggested format for a certificate follows:
